Computational Economics **9** (1996)

Volume Contents for Volume 9

Volume 9 No. 1 1996

Special Issue

Computational Finance: Papers from the IFAC Workshop on Computing in Economics and Finance, held at the University of Amsterdam, June 1994

Guest editors: Manfred Gilli & Anna Nagurney

MANFRED GILLI and ANNA NAGURNEY / Preface 1–2

ANNA NAGURNEY / General Financial Equilibrium Modelling With Policy Interventions and Transaction Costs 3–17

ALEXANDER EYDELAND / A Spectral Algorithm for Pricing Interest Rate Options 19–36

CHRISTIAN HÆFKE and CHRISTIAN HELMENSTEIN / Neural Networks in the Capital Markets: An Application to Index Forecasting 37–50

WILLIAM VERKOOIJEN / A Neural Network Approach to Long-Run Exchange Rate Prediction 51–65

YPKE HIEMSTRA / Linear Regression versus Backpropagation Networks to Predict Quarterly Stock Market Excess Returns 67–76

ILONA JAGIELSKA and JANUSZ JAWORSKI / Neural Network for Predicting the Performance of Credit Card Accounts 77–82

Volume 9 No. 2 1996

W. JILL HARRISON and K.R. PEARSON / Computing Solutions for Large General Equilibrium Models Using GEMPACK 83–127

MARIA ROSARIA D'ESPOSITO and MARILENA FURNO / Robust Procedures in Multiple Regression: P-subsets and a Computational Proposal 129–147

LIANGYUE CAO, YINGUANG HONG, HANZHANG ZHAO and SHUHUI DENG / Predicting Economic Time Series Using a Nonlinear Deterministic Technique 149–178

Volume 9 No. 3 1996

Special Issue

Computational Economics and Statistics at the Certosa

Guest editor: David A. Belsley

DAVID A. BELSLEY / Editor's Preface 179–180

DAVID A. BELSLEY / The Relative Power of Zero-Padding when Testing for Serial Correlation Using Artifical Regressions 181–198

CORRADO PROVASI / Using Algebraic Software to Compute the Moments of Order Statistics 199–213

GIANFRANCO GALMACCI / Collinearity Detection in Linear Regression Models 215–227

SANTOSH KABADI, KATTA G. MURTY and COSIMO SPERA / Clustering Problems in Optimization Models 229–239

SELDEN B. CRARY AND COSIMO SPERA / Optimal Experimental Design for Combinatorial Problems 241–255

CARLO BIANCHI and EUGENE M. CLEUR / Indirect Estimation of Stochastic Differential Equation Models: Some Computational Experiments 257–274

Volume 9 No. 4 1996

CARL P. SCHMERTMANN / Functional Search in Economics Using Genetic Programming 275–298

CHRISTOPHE BISIÈRE / SD-Solver: Towards a "Multidirectional" CLP-based Simulation Tool. Framework and Short Financial Examples 299–315

RAOUF BOUCEKKINE and CUONG LE VAN / Checking for Saddlepoint Stability: An Easy Test 317–330

W. JILL HARRISON, K.R. PEARSON and ALAN A. POWELL / Features of Multiregional and Intertemporal AGE Modelling with GEMPACK 331–353

KATHLEEN M. LANG and PETER GOTTSCHALK / The Loss in Efficiency from Using Grouped Data to Estimate Coefficents of Group Level Variables 355–361

ANNA NAGURNEY and KATHY DHANDA / A Variational Inequality Approach for Marketable Pollution Permits 363–384
